

Spinneret Wind Energy Center

The Spinneret Wind Energy Center, with a targeted COD in 2028, is a proposed 2,000-megawatt (MW) wind facility in Union County, New Mexico. Wind energy is clean, renewable power from one of the oldest known energy sources, and today it is one of the cheapest.

Enough electricity to power up to **750,000 American homes** per year

More than **\$2.6 billion** invested in local economy over the life of the project

Approximately **6,500 jobs** will be supported during construction

Up to **200 full-time** operations and maintenance staff

Emissions reductions equivalent to **815,000 cars** off the road per year

Supports local education, emergency & veteran services and environmental stewardship

Uses the most up-to-date, innovative technology

2,000 megawatts of renewable energy

Development Timeline

2022–2026	2026–2028	2028
Development Activities include wind assessment, environmental studies, interconnection studies, etc.	Construction	Operation

Invenergy's Grand Ridge Wind Energy Center located in LaSalle County, Illinois.

A Proven Track Record in Sustainable Energy Development

Invenergy is a world leading developer and operator of sustainable energy solutions.

A U.S.-based company, Invenergy invests \$278 million annually in the home communities where its projects are located.

Invenergy has successfully developed

more than 190 projects, totaling over 30,000 megawatts, including wind, solar, natural gas power generation and advanced energy storage projects.
